Work Experience

Present

Vinyls Store

Freelance

We're in the final stages of developing an online vinyl store, where the frontend has been built using JavaScript for dynamic interactions, EJS as the templating engine to render server-side content, and CSS for styling and responsive design. This combination ensures a smooth and engaging user experience.

Users can browse products, manage their carts, and handle transactions with ease. The frontend also includes session management, allowing for a personalized experience where users can log in and access their account details. Both administrators and regular users have distinct interfaces, enabling efficient product browsing, account management, and more. The design prioritizes usability and responsiveness across devices.

2019 - 2024

Maggiora S.A

Administration

I manage administrative tasks and actively participate in site visits, supervising the progress of projects. My academic training at the National University of La Rioja is complemented by solid practical experience in the field, which allows me to effectively integrate the theoretical and practical aspects of architecture and construction.

Education

2023 - 2024

Full Stack Developer | Mercado Libre / Globant

Digital House

My passion for technology and computing led me to shift my career path and train as a Full Stack Developer at Digital House, an institution supported by Mercado Libre and Globant. During my studies, I developed skills in various technologies. On the frontend, I am proficient in JavaScript, HTML, CSS, Tailwind CSS, and React. In the backend, I have experience with Node.js, Express, Sequelize, MySQL, and REST APIs. I also gained experience in version control using Git, with GitHub as a platform for repository hosting and collaboration. Additionally, I have experience implementing agile methodologies such as Scrum.

2014 - 2019

Architecture student (4 year)

National University of La Rioja

SKILLS

You can see my projects in: <https://portfolio-mx.vercel.app/>

Front-end : TypeScript, React , Tailwind CSS , JavaScript , CSS, HTML .

Back-end: Node.js, Express , REST APIs, Sequelize and MySQL.

LANGUAGES

Spanish, English, Catalán
